

Derek E Kelly

422 CRB ◊ 415 Curie Blvd ◊ Philadelphia, PA 19104-6145 USA
derkelly@pennmedicine.upenn.edu

EDUCATION

University of Pennsylvania

Ph.D. in Genomics and Computational Biology
Advisor Dr. Sarah Tishkoff

April 2022 (anticipated)

University of Missouri, Columbia

B.S. in Anthropology and Biology
Minors in Mathematics and Art
Graduated Magna Cum Laude
Member Phi Beta Kappa

May 2013

TECHNICAL SKILLS

Programming Languages	R, Bash, Python, Perl, MATLAB
Genomic Analysis	RNA-seq, scRNA-seq, CITE-seq, DNase-seq, ATAC-seq, ChIP-seq
Genetic Analysis	Variant Calling (SNP, Indel, SV), GWAS and molecular QTL mapping, Admixture, Relatedness, Selection
Statistical Analysis	Regression (Linear, Generalized, Regularized, Mixed Effect), Survival Analysis, Machine Learning (SVM, HMM, Clustering, Random Forest, Neural Networks), Bayesian Models and Inference
Document Processing	MS Office (Word, PowerPoint, Excel), Adobe Illustrator, LaTeX

ANALYTICAL SKILLS

- Digesting primary literature from diverse technical and scientific fields
- Evaluating the impact of technical and biological variables in high dimensional data
- Building and troubleshooting bioinformatic pipelines that process large, complex datasets
- Assessing causality and reverse-causality between genetics, molecular processes, ancestry, and the environment
- Breaking down complex topics and communicating at appropriate levels of detail

INVITED PRESENTATIONS

The genetics of skin pigmentation in Africa <i>Hands-On, Minds-On Professional Development for Local Teachers</i>	January 2019
Novel loci underlying Human skin pigmentation variation in Africa <i>Skin Biology and Disease Resource-Based Center Symposium</i>	September 2018
Understanding the genetic basis of human adaptation in Africa through integrative genomics <i>Penn GCB & IBI Retreat</i>	May 2018

TEACHING EXPERIENCE

TA BIOL 522 Human Evolutionary Genomics	Spring 2018
• Aided in developing a reading list covering human demographic history, archaic hominins and ancient DNA, genetic variation, comparative genomics, human adaptation, gene regulation and epigenetics, and the human microbiome. Guided discussion of the literature and aided students in developing a course presentation.	
Tutor STAT 510 Probability	2017 - 2018
• Tutored students in topics including: discrete and continuous random variables and their distributions; expectation and conditional expectation; moments and moment generating functions; functions and transformations of random variables; law of large numbers and the central limit theorem; point estimation: sufficiency, maximum likelihood, minimum variance, and confidence intervals
